It's Now Time for FALL PLANTING

Nature dictates a MUST to all gardeners who wish to enjoy the glory of a spring garden. That MUST relates to planting certain bulbs RIGHT NOW—THIS FALL. Lest you delay beyond the period set by nature do it NOW, for autumn passes quickly and if you wait until frosts have put an end to your autumn display the choicest time to plant most bulbs, excepting Tulips, will have slipped by. Make sure yours will be a prize garden by sending your order to Dreer’s now.

Surprise Yourself with Bulbs That Bloom This Fall

Glamarous Meadow Saffron (Colchicum), sprightly Autumn Crocus, and graceful Autumn Daffodil (Styrembergia) will bloom this fall. They are perfectly hardy and will give you many years of enjoyment, but—you’ll have to plant right now!

Here is Your Dream Garden
To Bloom next Spring and Summer

Start off the season’s parade with Snowdrops, Eranthis, Chionodoxa, Crocus, Scilla, Muscaris, and Erythronium. Continue the show with Tulips, Daffodils, and Hyacinths. Among the Tulips the Single-Early and Double-Early kinds flower first. Before these pass the beautiful new Triumph Tulips are in bloom to last until the May-flowering types—Darwin, Breeder, and Cottage—reach their prime. Always admired for their exotic beauty are Brodiaea, Calochortus, Fritillaria and the rare Spring Starflower or Triteleia. Include Camassia, Leucocoryne (Snowflake), and the stately Eremurus to add some special interest.

Enjoy the Thrill of Growing Flowers Indoors in Winter

Start with Dreer Quality Bulbs of fragrant Paper-White Narcissus and have them blooming in the house all through the winter and early spring. Place several bulbs in a bowl filled with pebbles and water and start a new container every two weeks to provide a continuous succession of flowers. The showy Soleil d’Or Narcissus and the Chinese Sacred Lily also are easy to grow in a cool room. Hyacinths are another favorite of simple culture to give an abundance of living room splendor. And there are many others for the gardener who has a conservatory or a room where the temperature can be held at 45° to 60° F.

Attractive Prices for Choicest Quality

Good gardeners know that quality is the most important single factor to success and they also know that quality goods are the cheapest in the end. Dreer’s Quality Bulbs are offered at most attractive prices. For one hundred years millions of gardeners have entrusted their orders for Bulbs, Seeds, and Plants to Dreer’s, secure in the knowledge that their gardens would be a joy supreme.

Fascinating **Triumph Tulips**

**A Glorious New Giant-Flowered Race**

This new race of Tulips brings to our gardens giant blooms in colors and color combinations distinctly different from all other Tulips. Furthermore they bloom within the interim of the Early Single varieties and the Cottage, Darwin, and Breeder classes so that now one may have a continuous display of Tulips throughout the spring. They are of sturdy compact growth and exceptionally colorful.

**Aliga.** We selected this variety for its exceptionally clear heliotrope color. While it is a trifle dwarfer than the others its robust habit and large size are outstanding. 16 inches. 3 for 25c; 12 for 85c; 100 for $5.50.

**Aviateur.** A brilliant carmine with a wide creamy white border. The inside is garnet-red relieved by the light border at the petal edges. Very showy. 20 inches. 3 for 27c; 12 for 90c; 100 for $6.50.

**Kansas.** A glistening pure white flower of magnificent size and superb form. Like the others in this class it is a vigorous sturdy variety. Among the earliest to come into bloom. 20 inches. 3 for 28c; 12 for 95c; 100 for $6.75.

**Lord Carnarvon.** Somewhat taller than the others and equally as vigorous. A soft rose-pink enhanced by a beautiful white margin. An exceptionally fine Tulip. 25 inches. 3 for 24c; 12 for 80c; 100 for $5.50.

**Ribera.** We recommend this particularly attractive new Tulip because of its striking color effect. The well-formed large blooms are bright yellow, mottled and stippled with Fuchsia red. 22 inches. 3 for 25c; 12 for 85c; 100 for $6.00.

**Zimmerman.** A splendid tall vigorous grower of an enchanting vivid pure rose, cast over a creamy ground and finished with a deeper rose tone at the upper edges. 23 inches. 3 for 24c; 12 for 80c; 100 for $5.50.

Dreer's Lovely Cottage Garden Tulips

The Cottage Garden Tulips are a very popular class. They bloom at the same time as the Darwins and Breeders with which they combine most effectively. They are noted for their range of charming colors and include such world wide favorites as Inglescombe Pink and Inglescombe Yellow. We particularly recommend the newer varieties which we have grouped together on this page under the heading "Regal Cottage Garden Tulips" for they represent some of the most outstanding new creations in this showy and popular spring flower. The blooms not only are exceptionally large but also of substantial texture with strong sturdy stems giving a good support to the flower. The form of the blooms is artistic and graceful and you will find among them the popular Lily-flowered varieties such as Alaska, Picotee, Sirene, and Martha.

Avis Kennicott. A graceful, long-petaled variety of glistening rich golden yellow. Has a finely stippled and pencled black blotch on the inside base of each petal. 25 inches. 3 for 21c; 12 for 80c; 100 for $5.50.

Scillas and Grape Hyacinths continue the procession with Fritillaria, Lily of the Valley, Anemone, Calochortus, Erythronium, Leucojum, and Rannunculus providing a succession that leads up to the early summer-flowering plants. For blooming this fall plant Colchicum and Fall-Flowering Crocus without delay.

Late Autumn is SHRUB

Given your home an atmosphere of cozy charm with a few well chosen shrubs. A few dollars spent for some of the rarer shrubs will add an air of serenity and restfulness that will give distinction to your home grounds. Late autumn is the ideal time to plant shrubs. They usually can be dug after the middle of October and where frost enters the ground previous to that time a few burlap bags, hay, straw, or manure will keep the soil workable until the plants arrive.

As growth varies according to conditions we give the approximate height as follows: D = Dwarf (less than 4 feet high); M = Medium tall (4 to 8 feet high); T = Tall (8 feet and taller).

### Dreer’s Reliable Perennial Flower Seeds

**For Autumn Sowing**

Early autumn is a favorite time with many gardeners to sow perennial flower seeds. To hasten them along a cold frame or a similar temporary structure should be used. Those marked * give best results if the seed is sown late in the fall. They need the action of frost to sprout freely during the coming spring.

To help our customers in selecting varieties for the rock garden we have used the symbol △ to identify them at a glance. These varieties also are splendid for dwarf beds, borders, or for edgings. Plants suited for the semi-shade are marked ○, and those that will grow in deeper shade ◆. Practically all of these also do well in a sunny position.
